07 Mounting notes

When assembling the columns it is important that this is done in a horizontal position. A fully assembled column is lifted by two people and its lower end is carefully guided towards the floor and floor plate. The columns must stand completely level; the boards are installed only after the columns have been positioned correctly. Keep fingers away from the cabling during assembly to avoid pinching or damage. Tools according to the mounting guide: drill with 10 mm bit, cordless screwdriver, hex key 6, spanners 10 and 13, spirit level, tape measure.
