

Chameleon Pebbles

Specifications

Chameleon Quality

The core of the Chameleon range consists of whiteboards. A Chameleon whiteboard is characterized by quality that is visible in four ways:

1. Thickness: Chameleon whiteboards are 10 mm thick and have a robust, water-repellent MDF core (FSC-certified, see sustainability).
2. Surface: Chameleon whiteboards have high-quality enamel steel, which is characterized by a smooth surface without irregularities. We offer a lifetime guarantee on all enamel surfaces for writing and erasing. Below you will find an overview of our enamel surface options.
3. Processing: Chameleon whiteboards are cut by machine and then painted by hand. We attach great importance to the finish.
4. Mounting: Chameleon uses a unique TÜV-certified mounting system that works with magnetic plates.
