

SatinTones

Colourful silky whiteboards

Colourful silky whiteboards

Experience the whiteboard in a new way. The high-gloss white and glass make way for a silky matte colour experience, perfect for any modern interior. Chameleon SatinTones are ceramic steel whiteboard surfaces available in 6 different colours. The low-gloss surface offers the same customization possibilities as traditional surfaces.

Satin Snow S200

Satin Snow offers a fresh, crisp brightness that is both timeless and modern. This pure white radiates simplicity and sophistication, creating the perfect canvas for ideas and communication. The subtle matte finish adds an extra layer of elegance without being overwhelming. Satin Snow is versatile and minimalist, ensuring that every detail on the whiteboard stands out clearly and sharply. It is the ideal choice for a professional, organized environment.

Satin Stone S201

Satin Stone embraces the timeless strength of gray, a colour that adds subtle refinement and stability to any space. Its cool, neutral character provides the perfect backdrop for sharing ideas without distraction. This shade exudes professionalism and balance, ideal for offices and meeting rooms where focus and productivity are key. Satin Stone creates a sense of calm and order, allowing the whiteboard to blend seamlessly into both modern and traditional interiors.

Satin

Almond S204

Satin Almond is a warm tone that radiates tranquility. The soft beige undertone makes it an ideal choice for environments where balance and serenity are desired. On a whiteboard, Satin Almond creates a subtle yet stylish look that effortlessly complements various interior styles. The surface exudes refinement and invites clear thinking and focused work while contributing to a pleasant and harmonious atmosphere in the space.

Satin Blossom

Blossom S205

Satin Blossom is a subtle, soft colour reminiscent of the first blossoms of spring. This shade exudes refinement and strikes the perfect balance between understated elegance and modern freshness. On a whiteboard, Satin Blossom brings a serene atmosphere to any space without distracting from the important information. The delicate pink undertone integrates seamlessly into both minimalist and colourful interiors, making it not only a functional but also an aesthetically refined element in any work or learning environment.

Why SatinTones?

Chameleon SatinTones offers more than just color. The ceramic steel surface is just as scratch-resistant and perfectly erasable as a glass whiteboard, but with some additional benefits:

- **Better readability** thanks to the matte surface.
- **Calmer appearance** because the colour is integrated into the surface without shadows.
- **Mix & Match:** seamlessly integrates with other materials.
- **Customization options:** our whiteboards are fully customizable with special dimensions, cut-outs, and personal designs.
- **Affordable alternative** to expensive matte glass boards, **up to 90% lower in price.**
