

Chameleon Combi Products

Chameleon Combi Products

A whiteboard that reduces disruptive echo in the room. It combines functionalities that contribute to more efficient collaboration in office buildings. Chameleon Combi products are preconfigured solutions that can be seamlessly integrated into interior concepts with a one-to-one fit.

The combination of a whiteboard and acoustic PET felt also results in exciting shapes. Add the possibilities of various colour options, and you'll see that Chameleon Combi products form an almost perfect symbiosis with stylish interior design.

Chameleon Writing

The core of the Chameleon range is formed by the whiteboard. A Chameleon whiteboard can be recognized for its quality, which is visible in four ways:

1. Durability: Chameleon whiteboards are 10 mm thick with a robust, water-repellent MDF core (FSC-certified, see sustainability).
2. Surface: Chameleon whiteboards feature high-quality magnetic ceramic steel, recognizable by a smooth surface without imperfections. We offer a lifetime warranty on writing and erasing on all ceramic steel surfaces. Below is an overview of our ceramic steel surface options.
3. Finish: Chameleon whiteboards are machine-cut and then hand-finished. We pay great attention to the finishing process.
4. Installation: Chameleon uses a unique TÜV-certified mounting system that works with magnetic plates.

Type	Surface + code	Colour	Description	Writing / erasing	Panel edge colour	Maximum dimension
High Gloss	High Gloss HG100		Most popular whiteboard surface with a high gloss finish	Whiteboard markers / dry erase	White lacquered	1480x2980 mm
	Satin Snow S200		White whiteboard with a somewhat matte surface, also suitable for projection	Whiteboard markers / dry erase	White lacquered	1180x2980 mm
Satin Tones	Satin Stone S201		Grey whiteboard with a somewhat matte surface	Whiteboard markers / dry erase	Grey lacquered	1180x2980 mm
	Satin Aqua S202		Blue whiteboard with a somewhat matte surface	Whiteboard markers / dry erase	Blue lacquered	1180x2980 mm
	Satin Leaf S203		Green whiteboard with a somewhat matte surface	Whiteboard markers / dry erase	Green lacquered	1180x2980 mm
	Satin Almond S204		Beige whiteboard with a somewhat matte surface	Whiteboard markers / dry erase	Beige lacquered	1180x2980 mm
	Satin Blossom S205		Pink whiteboard with a somewhat matte surface	Whiteboard markers / dry erase	Pink lacquered	1180x2980 mm
Chalk	Chalk Graphite C300		Colourfast, durable surface with a soft and even colour distribution	Chalk / dry erase	Black lacquered	1180x2980 mm
	Chalk Canopy C301		Colourfast, durable surface with a soft and even colour distribution	Chalk / dry erase	Black lacquered	1480x2980 mm
Projection	Projection		Very matte surface, suitable for projection	Whiteboard markers / wet erase	White lacquered	1480x2980 mm

Chameleon surfaces

What is Ceramic steel?

All Chameleon surfaces on this page feature a top layer of ceramic steel. This is an enamel layer that is comparable to glass in terms of hardness and smoothness. Thus, it is equally scratch-resistant and has the same long lifespan. Chameleon offers the following ceramic steel surfaces:

High Gloss

This is the best-selling whiteboard surface. The surface has a high gloss level, though not as high as glass whiteboards. The advantage of the glossy surface is that markings are perfectly visible on it. This makes it ideal for presentations and situations where reading from a distance is necessary, such as in schools.

SatinTones

SatinTones is a ceramic steel surface with a matte appearance. The surface radiates calmness and is perfectly readable from all angles. Moreover, this surface is available in six subtle colour shades. SatinTones is a good alternative to glass whiteboards.

Chalk

Choosing a chalkboard has specific reasons. The main reason is that nuances can be applied with chalk by pressing harder or softer. The Chameleon chalkboard surface is, like the whiteboard surfaces, made with ceramic steel. As a result, Chameleon chalkboards are also perfectly erasable for life. The matte surfaces are available in green and grey.

Projection

This extremely matte surface shows no reflections at all. Projecting onto this board provides the best possible image quality from projectors. The board is writable, but erasing is significantly more challenging. However, using whiteboard spray when erasing will clean the board effectively.

Chameleon Acoustics

Material

Chameleon Acoustics is made of 100% recyclable polyethylene terephthalate (PET), a part of which is derived from recycled PET bottles. These materials are processed to create sound-dampening felt with a soft structure.

Thickness and dimensions

The thickness of the PET felt panels is 9 mm, and the maximum panel size is 120 x 240 cm.

Fire resistance

EN13501	B-s1, d0

Acoustics

When mounting directly on the wall. The complete test results are available upon request.

9 mm: α_w 0,25 / SAA 0,3

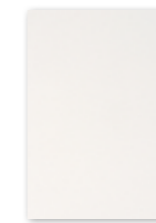

Mounting

The PET felt parts of the Chameleon Combi Products are mounted on the wall in 2 different ways.

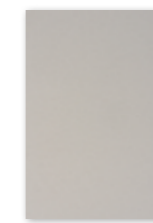

- Magnetic: quick, easy, and re-mountable. The panels (Elements) can be easily mounted and aligned relative to each other.
- With kit (not included): preferred for complete wall coverage (Walls and Coverings). The initial adhesion is flexible enough to allow the panels to be slightly adjusted during the final positioning.

Colours

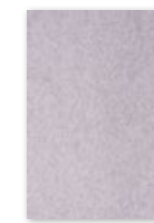

The 9 mm PET felt from Chameleon Acoustics is made of colour-ingrained felt. If the product is cut to a creative shape, this means the colour is also visible on the cut edges. We have made a selection of 21 colours, featuring a range of greys and browns.

Curve Combi

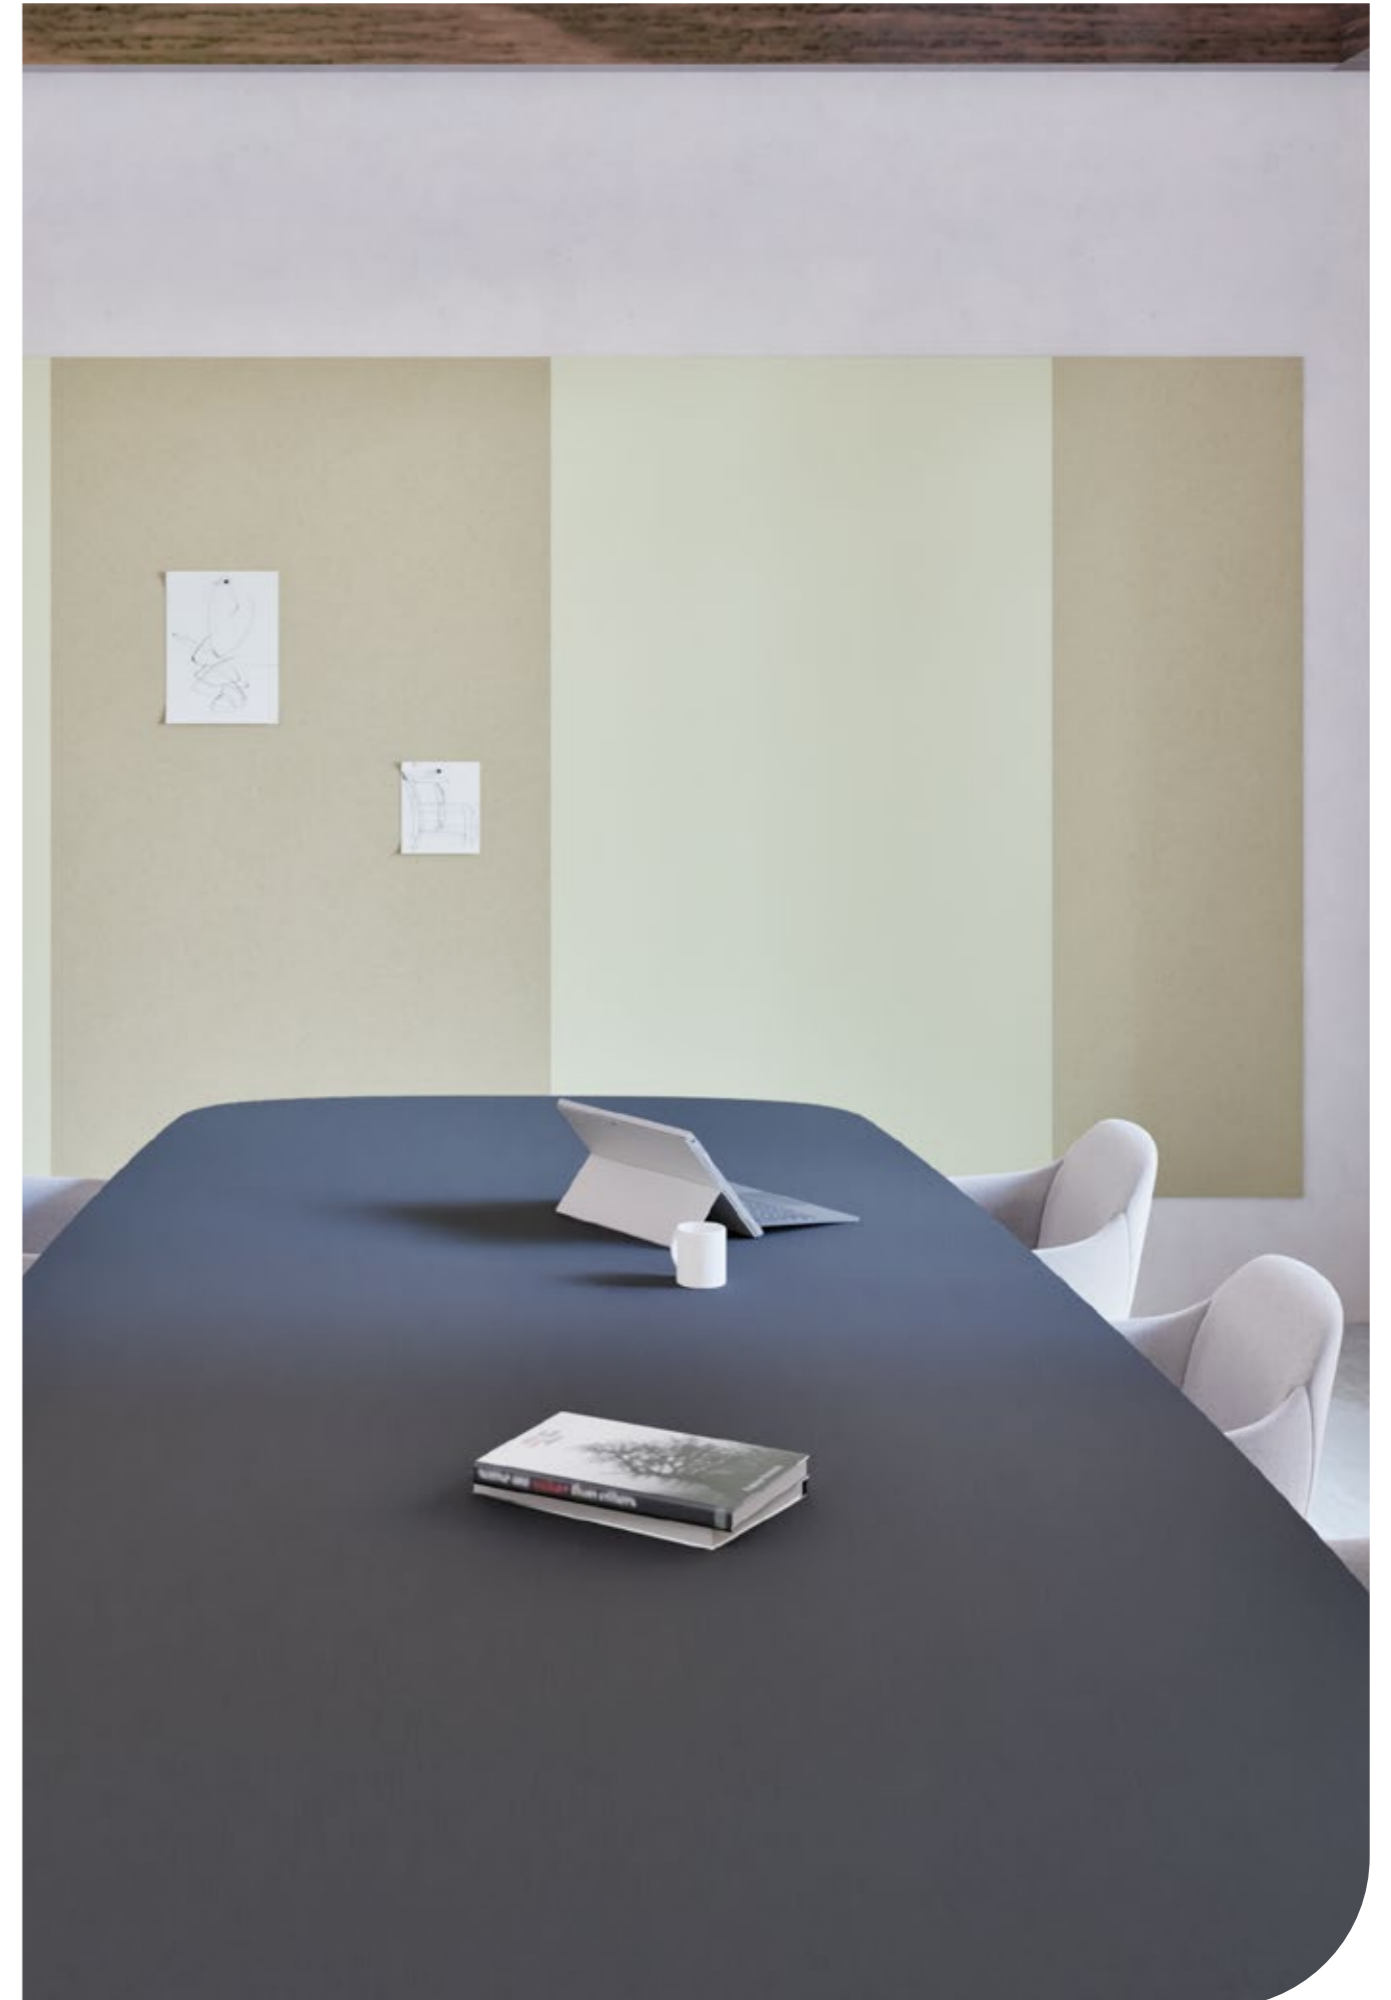

The rounded outer corners of the Chameleon Curve Combi create a visual fusion of functions: writing, pinning, and acoustic improvement. In office spaces and classrooms where collaboration and communication take center stage, the Curve Combi strikes the perfect balance between design and functionality. Rounded corners are associated with softness, friendliness, and harmony.

Sharp Wall Combi

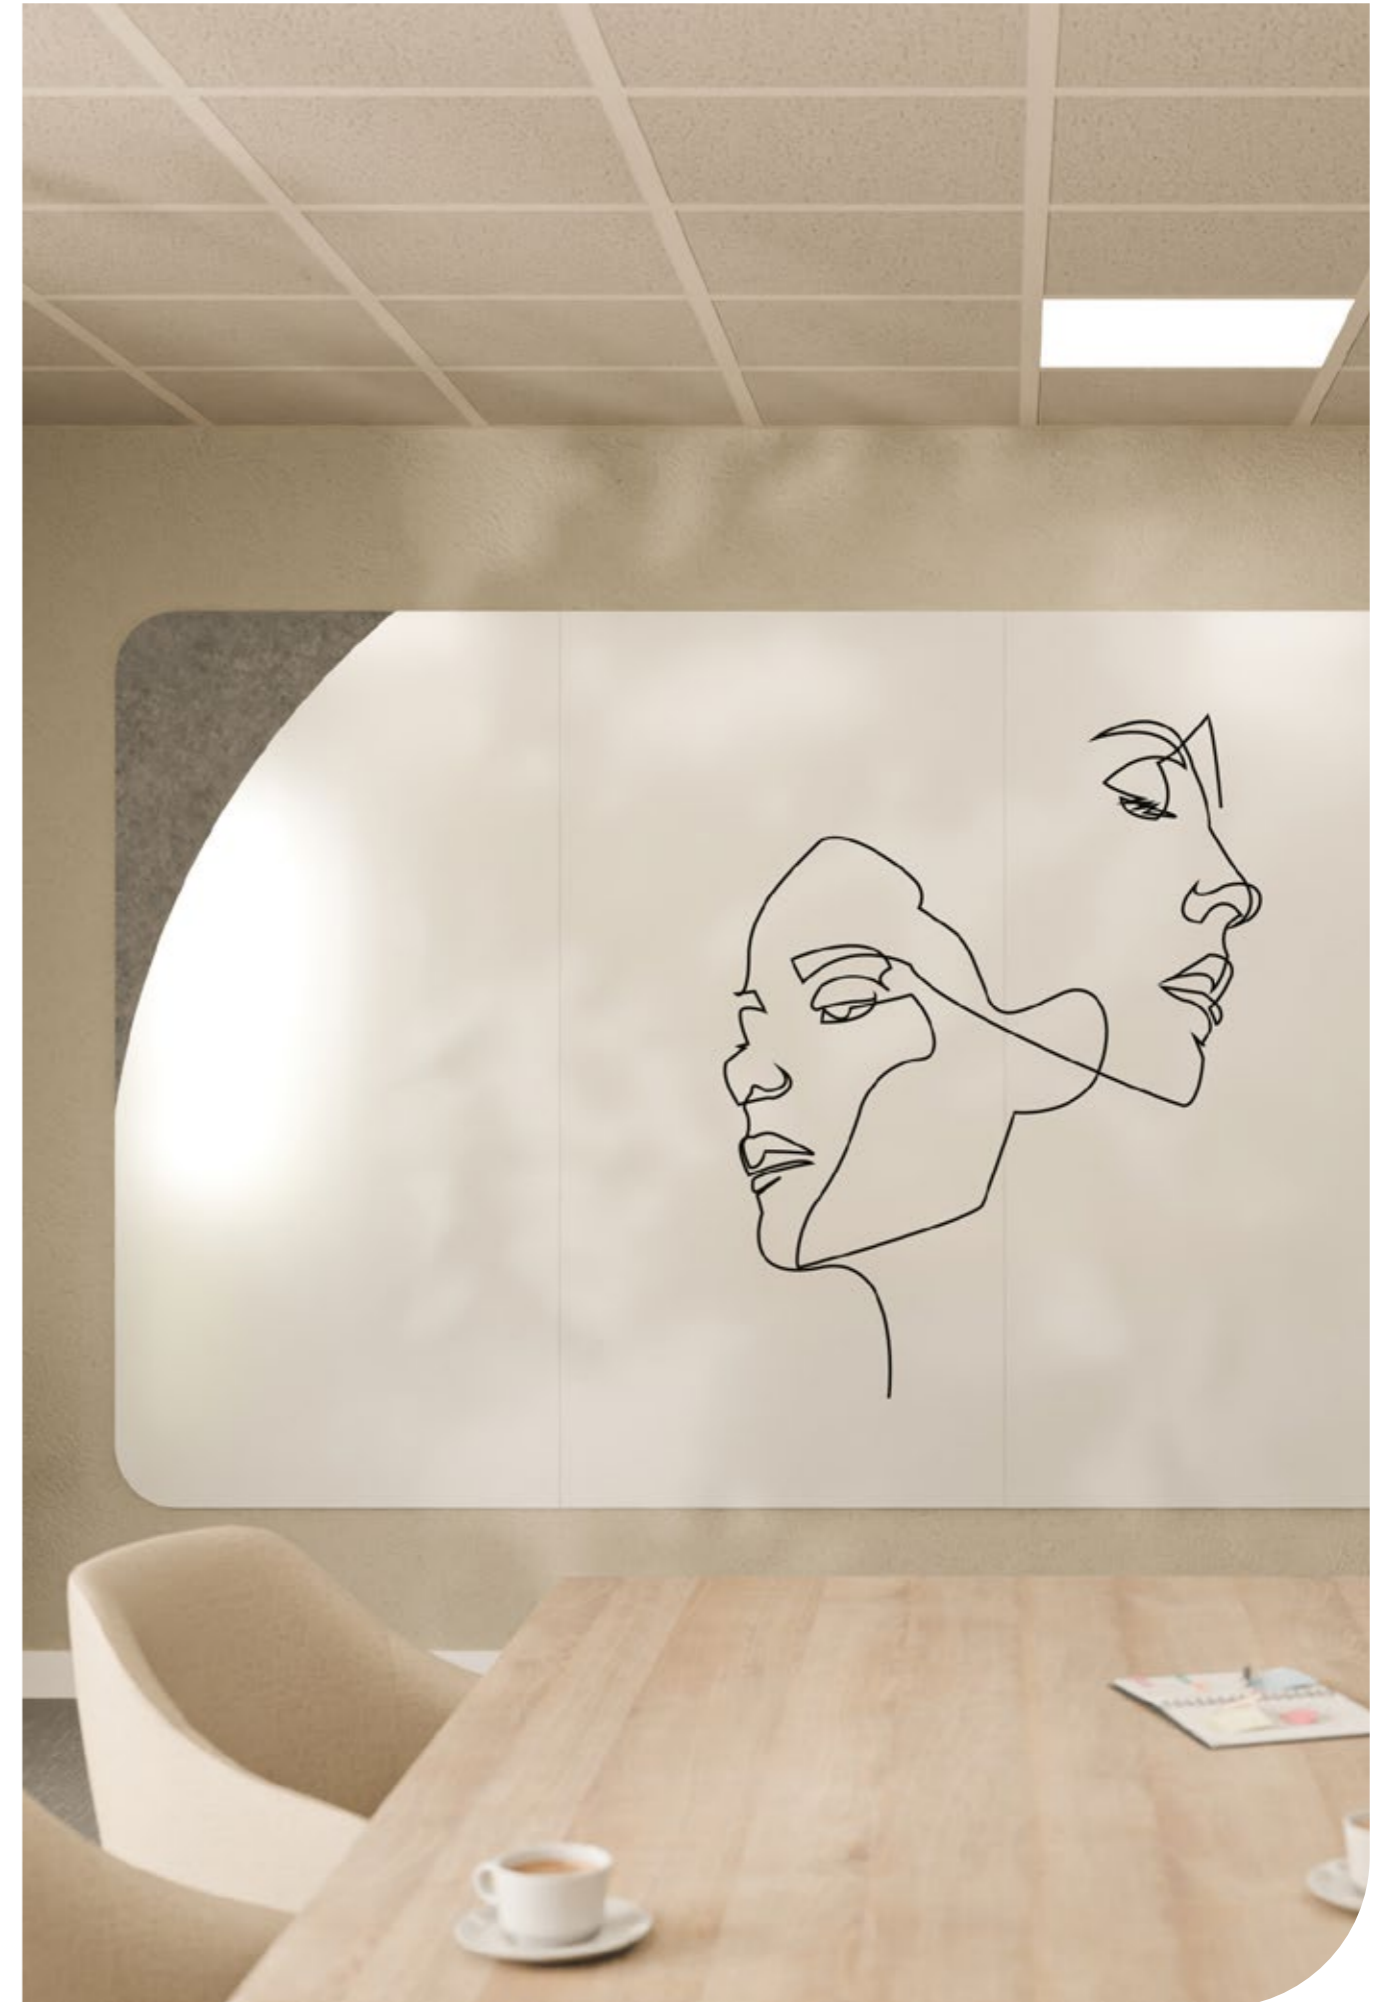

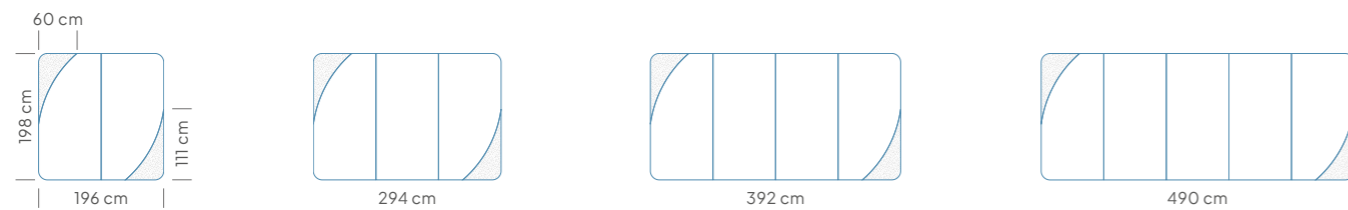

A wall you can write on, that enhances the room's acoustics, and doubles as a pinboard. The Chameleon Sharp Wall Combi is a multifunctional whiteboard wall that is ideal for collaborative spaces. By harmonizing the colours of the whiteboard and acoustic PET felt, it becomes a distinctive product that contributes to a harmonious interior design.

Curve Wall Combi

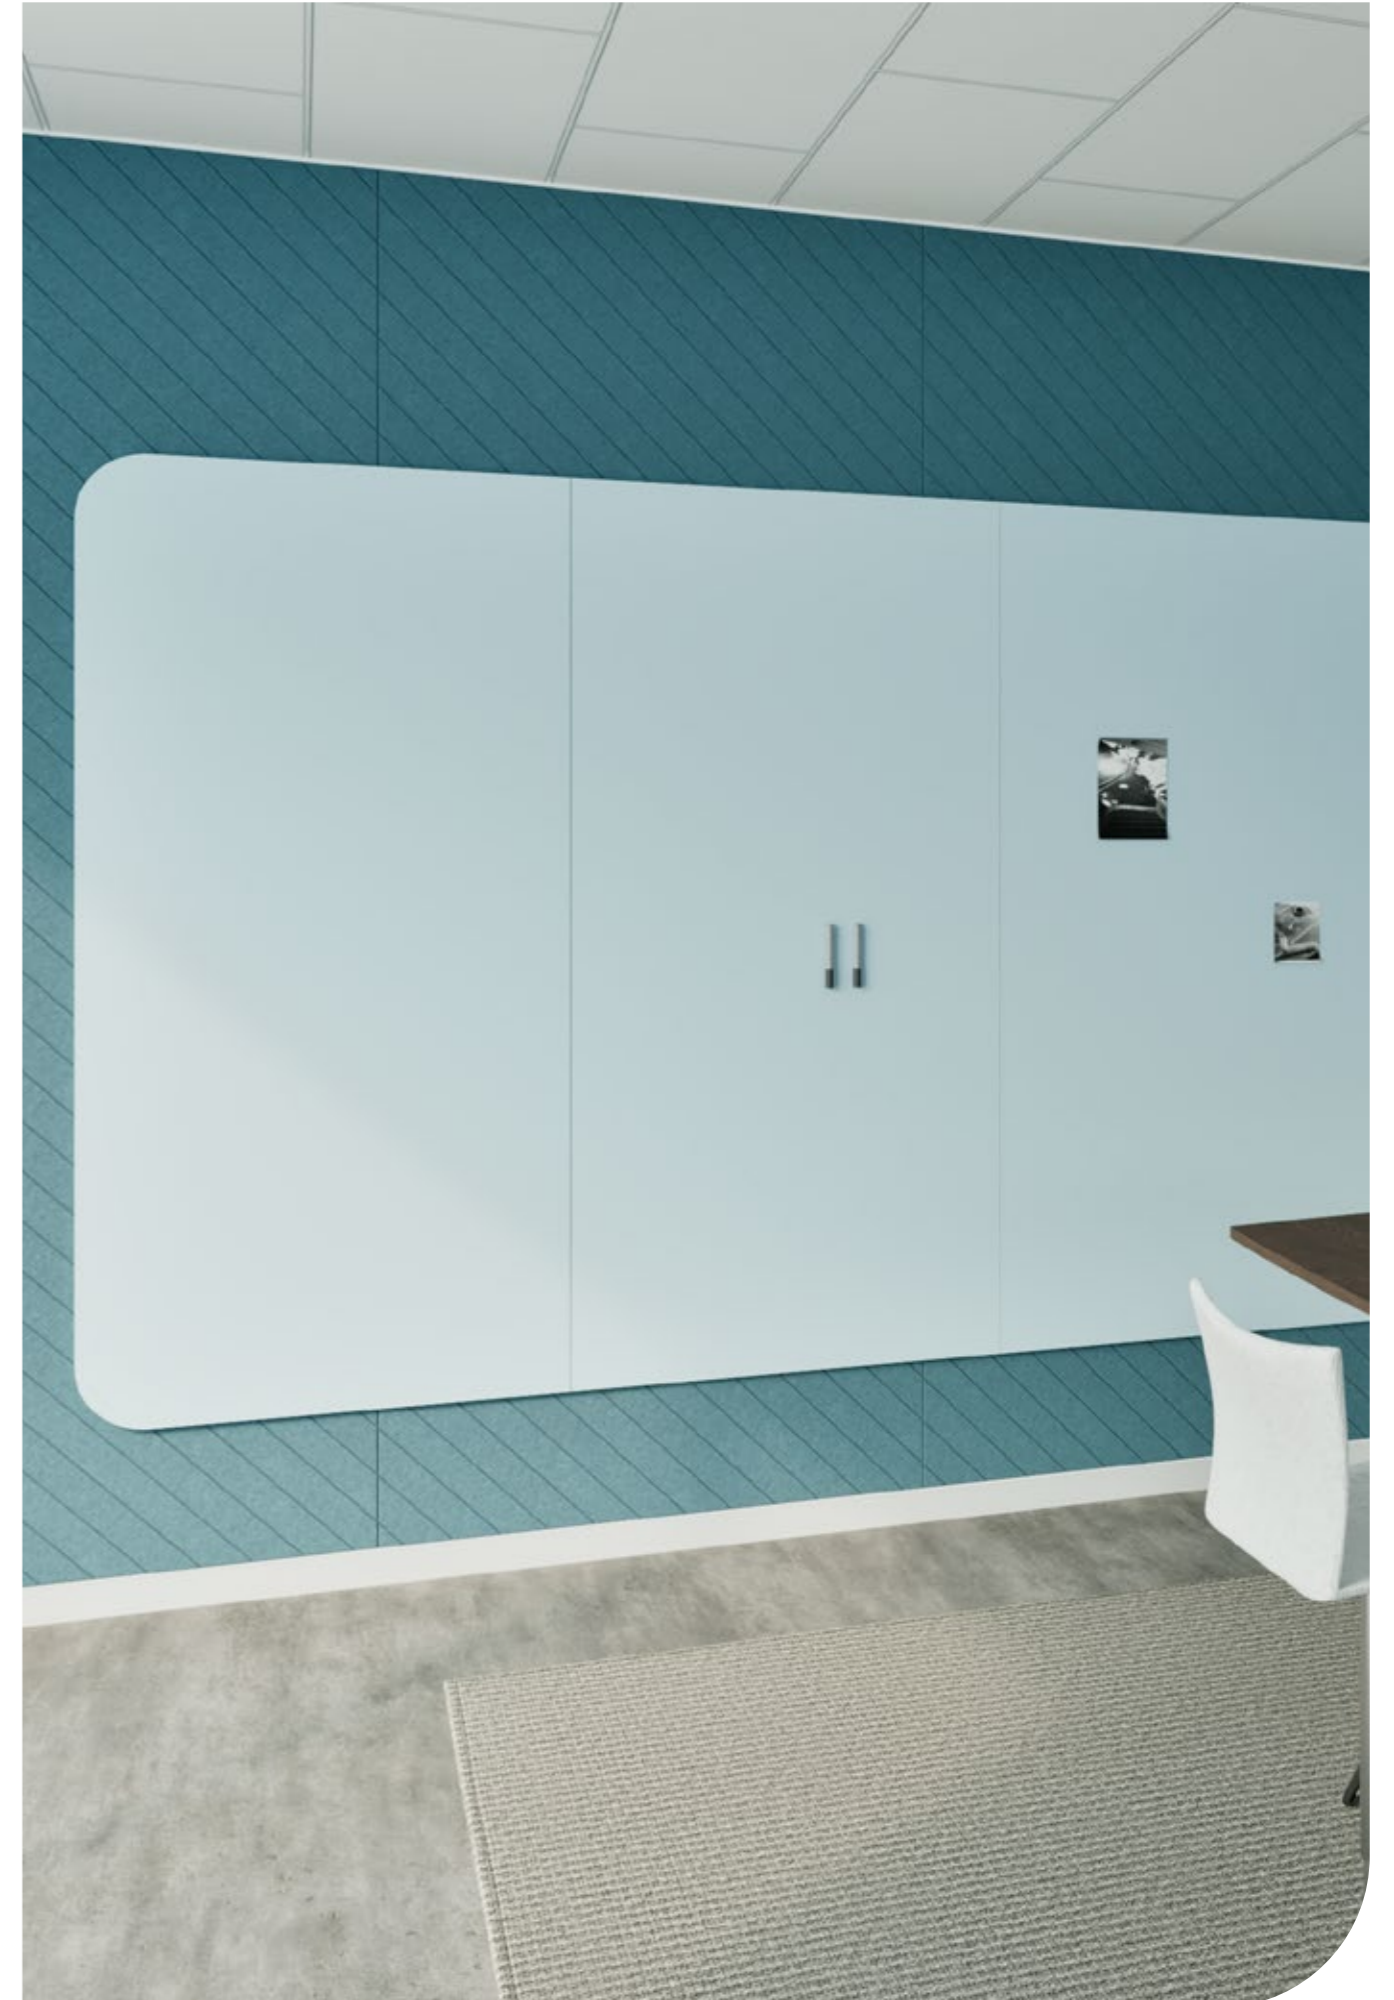

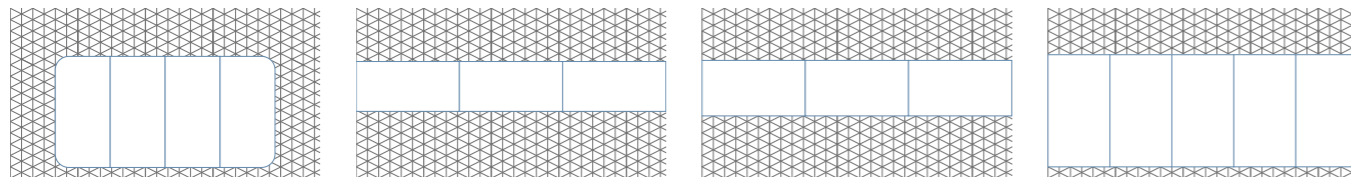

The Chameleon Curve Wall Combi embodies elegance and functionality. The soft, flowing lines bring a subtle energy to the space, while the combination of a whiteboard and acoustic PET felt adds harmony and depth to any interior. The PET felt absorbs sound and radiates tranquility while seamlessly integrating with the writing surface. Curve Wall Combi is a true eye-catcher that simultaneously blends effortlessly into the overall interior concept.

Curve Wall Combi

An environment where tranquility and functionality meet – that’s what the Wall Coverings Combi creates. With a single preconfigured installation, you gain a full wall that both dampens sound and provides space to share ideas. No plasterwork, no paint – just harmony and flexibility. Choose from a rich selection of colours for the PET felt and whiteboard surface, bringing a stylish balance to the room that enhances your design’s aesthetic. Perfect for workspaces where aesthetics and performance go hand in hand.
