

# Chameleon Harmonica Workwall

According to the founders of the Agile Manifest, the use of process visualisation on an analogue workwall results in more efficiency and transparency.

*“I want a workwall large enough that I and my team can connect various process components in an organised manner. We want to be able to write on it, stick items to it and hang items from it. What if I don't need the wall? I fold it in and simply wheel it out of view.”*

These could be the words of many a team manager looking for optimum cooperation and creativity in their team.

**Movable work surface of over 3.5 metres in width**  
Unfolded, the Chameleon Harmonica Workwall has a work surface of over 3.5 metres wide. Think big, because you can! Moreover, the whiteboard panels are magnetic, so you can work with a variety of scrum magnets and other magnetic accessories.

Once folded, the product does not measure more than 120 cm in width and 18 cm in thickness.

Many organisations see the benefit of an open office where contact and cooperation take place between teams. At the same time, teams want to be able to briefly separate themselves from the rest of the office for a sprint or team meeting, without hindering other employees. The Harmonica Workwall serves as a partition and offers the option of equipping one side with acoustic felt panels.
